### I. Hunt & Palmer Street Design – Joe DeLuca

# Memo

**To:** Salida City Council  
**From:** Tracy Vandaveer  
**CC:** Joe Deluca, Steve Rabe  
**Date:** October 21, 2016  
**Re:** Hunt & Palmer Street Widths

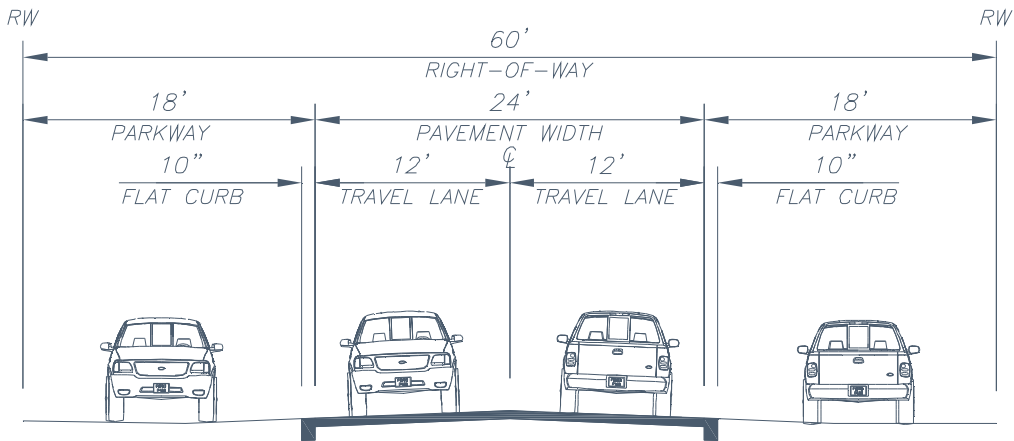

---

Thank all of you for taking the time to complete the field review on Hunt and Palmer Street with us. Below is a summary of the comments that we heard during the tours:

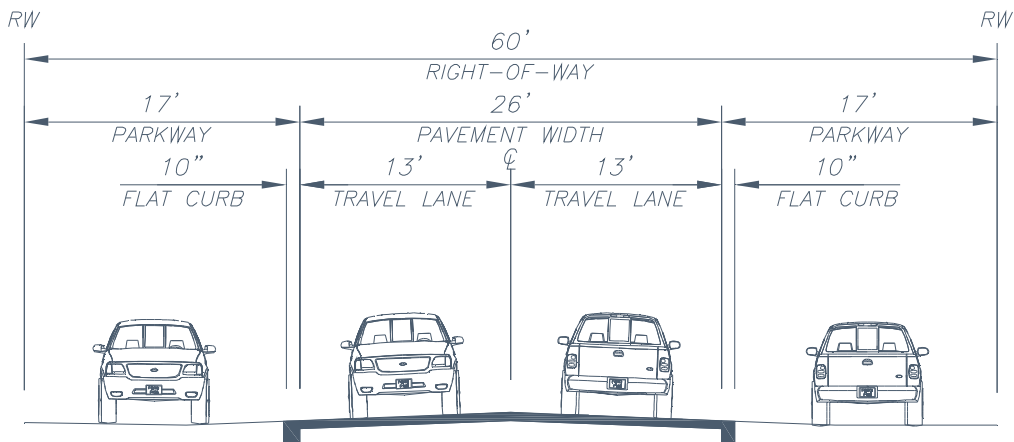

Width	Preference Votes
Prefer 26' wide	3
As wide as possible	1
Prefer 24'Wide	2
Keep existing widths	1

We've attached a sketches of the sections that we feel come closest to representing the preferences that we heard. Based upon these results, we would recommend a 26 ft. wide road section. This section strikes a balance between the project cost and width preference.

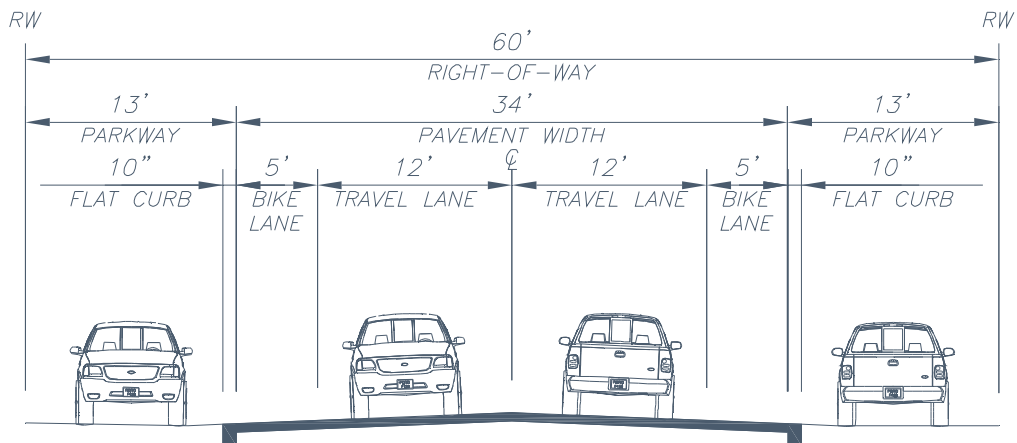

A decision on the design width is the critical path for having construction documents ready to bid by January 5, 2017 for spring 2017 construction start. Therefore, we respectfully request that Council provide us direction on which design width they would like us to proceed with.
